📘 ***EXP-02***

Aim :

To develop a JavaScript program to validate user input in an Online Quiz Application Registration Form, ensuring that details such as name, password, email, mobile number, and username meet required formats and constraints before successful registration.

Algorithm :

Step 1: Input
The user enters the following details in the registration form:

- First Name
- Last Name
- Username
- Password
- E-mail
- Mobile Number

Step 2: Validation Process

  - Validate First NameShould contain only alphabets
  - Minimum length: 6 characters
  - Display error message if invalid
  - Validate Last NameShould not be empty
  - Display error message if empty
  - Validate UsernameMust be at least 5 characters
  - Should not contain spaces
  - Display error message if invalid
  - Validate PasswordMinimum 6 characters
  - Display error message if invalid
  - Validate E-mailUse regular expression (example: name@domain.com)
  - Display error message if invalid
  - Validate Mobile NumberMust contain exactly 10 digits
  - No alphabets or special characters
  - Display error message if invalid

Step 3: Output Handling

- If any validation fails → show respective error messages
- If all validations pass → display success message

code :

```
<!DOCTYPE html>
<html>
<head>
  <title>Online Quiz Registration</title>
  <script>
    function validateForm() {
      let fname = document.forms["quizForm"]["fname"].value;
      let lname = document.forms["quizForm"]["lname"].value;
      let username = document.forms["quizForm"]["username"].value;
      let password = document.forms["quizForm"]["password"].value;
      let email = document.forms["quizForm"]["email"].value;
      let mobile = document.forms["quizForm"]["mobile"].value;

      let nameRegex = /^[A-Za-z]+$/;
      let emailRegex = /^[^ ]+@[^ ]+\.[a-z]{2,3}$/;
      let mobileRegex = /^[0-9]{10}$/;

      // First Name
      if (!nameRegex.test(fname) || fname.length < 6) {
        alert("First name must contain only alphabets and be at least 6 characters long");
        return false;
      }

      // Last Name
      if (lname === "") {
        alert("Last name cannot be empty");
        return false;
      }

      // Username
      if (username.length < 5 || username.includes(" ")) {
        alert("Username must be at least 5 characters and contain no spaces");
        return false;
      }

      // Password
      if (password.length < 6) {
        alert("Password must be at least 6 characters long");
        return false;
      }

      // Email
      if (!emailRegex.test(email)) {
        alert("Invalid email format");
        return false;
      }

      // Mobile Number
      if (!mobileRegex.test(mobile)) {
        alert("Mobile number must be exactly 10 digits");
        return false;
      }

      alert("Registration Successful!");
      return true;
    }
  </script>
</head>
<body>

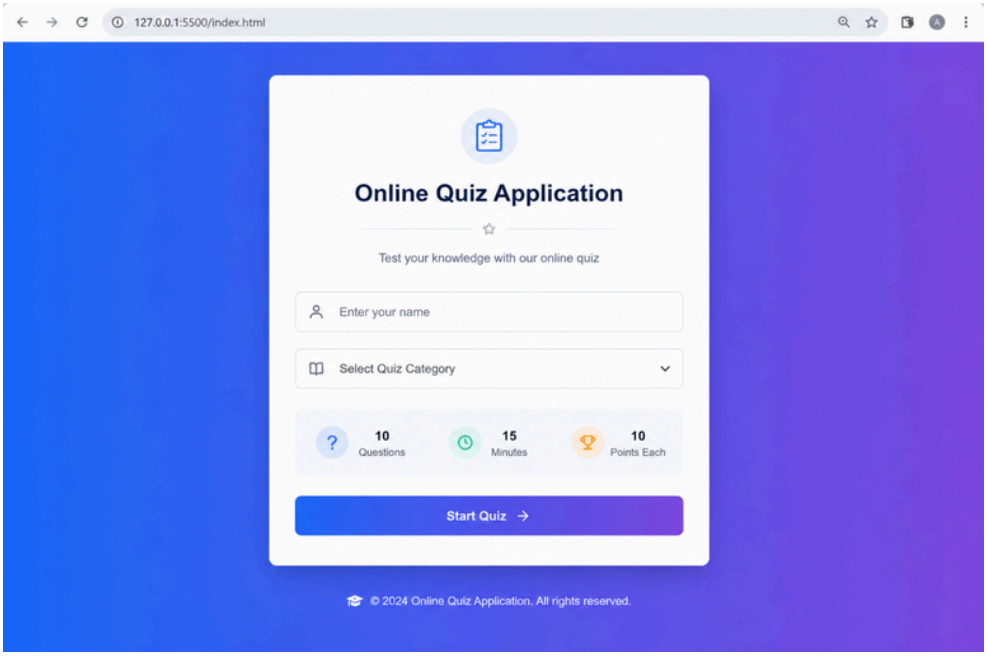
<h2>Online Quiz Application Registration</h2>

<form name="quizForm" onsubmit="return validateForm()">
  First Name: <input type="text" name="fname"><br><br>
  Last Name: <input type="text" name="lname"><br><br>
  Username: <input type="text" name="username"><br><br>
  Password: <input type="password" name="password"><br><br>
  Email: <input type="text" name="email"><br><br>
  Mobile Number: <input type="text" name="mobile"><br><br>

  <input type="submit" value="Register">
</form>

</body>
</html>
```

output :



result :

Your paragraph tThus, the Online Quiz Application Registration Form is successfully created and validated using JavaScript, ensuring all user inputs meet the required conditions before submission.
